

# INDEX

## SUMMER SCHOOL

### **Phase 1: Introduction to Geometric Algebra**

Rafał Abłamowicz: <i>On the structure theorem of Clifford algebras</i> .....	3
Rafał Abłamowicz: <i>A tutorial on CLIFFORD with eCLIFFORD and BIGEBRA. A Maple package for Clifford and Grassmann algebras (abstract)</i> .....	13
Ramon González: <i>Application of geometric algebra to plane and space geometry</i> .....	15
Ramon González: <i>The exterior calculus</i> .....	43

### **Phases 2 and 3: Kähler calculus and its applications**

José G. Vargas: *Notes on the Kähler calculus for the Summer School*

Chap. 1. <i>Perspective on the Kähler calculus for experts in Clifford analysis</i> .....	61
Chap. 2. <i>Kähler algebra</i> .....	71
Chap. 3. <i>Kähler differentiations</i> .....	86
Chap. 4. <i>Relativistic Quantum Mechanics</i> .....	107
Chap. 5. <i>Lie differentiation and angular momentum</i> .....	126
Chap. 6. <i>Conservation in Quantum Mechanics. Beyond Hodge's theorem</i> .....	145

## ALTERMAN CONFERENCE

### **Special topic: Grassmann's legacy with emphasis on the projective geometry**

Oliver Conradt: <i>Projective, Clifford and Grassmann algebras as double and complementary graded algebras</i> .....	165
--	-----

Oliver Conradt: <i>Projective geometry with projective algebra</i> .....	188
Paolo Freguglia: <i>Peano reader of H. Grassmann's Ausdehnungslehre</i> (abstract).....	197
Ramon González: <i>The affine and projective geometries from Grassmann's point of view</i> .....	198
Jose G. Vargas: <i>Grassmannian algebras and the Erlangen Program, with emphasis on projective geometry</i> .....	227

**General section:**

Rafał Abłamowicz: <i>On Clifford algebras and related finite groups and group algebras</i> .....	243
Vadiraja G. R. Bhatta, Shankar B. R.: <i>Polynomial permutations of finite rings and formation of Latin squares</i> (abstract).....	261
Bieber Marie, Kuncham Syam Prasad, Kedukodi Babushri Srinivas: <i>Scaled planar nearrings</i> (abstract).....	262
Danail Brezov <i>Higher-dimensional representations of <math>SL_2</math> and its real forms via Plücker embedding</i> .....	263
Pierre-Philippe Dechant: <i>A systematic construction of representations of quaternionic type</i> (abstract).....	275
Pierre-Philippe Dechant: <i>A conformal geometric algebra construction of the modular group</i> (abstract).....	277
Vladimir Dzhunushaliev: <i>The simplest non-associative generalization of supersymmetry</i> .....	278
Rodolfo Fiorini: <i>Geometric algebra and geometric calculus applied to pre-spatial arithmetic scheme to enhance modelling effectiveness in biophysical applications</i> .....	290
Ramon González: <i>On matrix representations of geometric (Clifford) algebra</i> .....	312
Jaroslav Hrdina, Aleš Návrát: <i>Binocular computer vision based on conformal geometric algebra</i> .....	339
Kuncham Syam Prasad, Kedukodi Babushri Srinivas and Bhavanari Satyanarayana: <i>Ideals in matrix nearrings and group nearrings</i> (abstract).....	351

Nikolay Marchuk: <i>Constant solutions of Yang-Mills equations and generalized Proca equations</i> .....	352
Zouhair Mouayn: <i>Coherent states and Berezin transforms attached to Landau levels</i> (abstract).....	366
Panackal Harikrishnan, Bernardo Lafuerza, K. T. Ravindran: <i>Linear 2-normed spaces and 2-Banach algebras</i> (abstract).....	367
Srikanth Prabhu, Kavya Singh, Aniket Sagar: <i>Facial recognition using modern algebra and machine learning</i> .....	368
Dimiter Prodanov: <i>Clifford algebra implementations in Maxima</i> .....	377
Akifumi Sako, Hiroshi Umetsu: <i>Fock representations and deformation quantization of Kähler manifolds</i> .....	395
Dmitriy Shirokov: <i>On some Lie groups containing Spin groups in Clifford algebra</i> .....	416
José G. Vargas: <i>What the Kähler calculus can do that other calculi cannot</i> .....	432
